

JACKSON GUARDIAN

The guardian of your funded accounts · Quick guide

1

INSTALL

In NinjaTrader 8: Tools → Import → NinjaScript Add-On...
Select the Jackson Guardian .zip file and restart NinjaTrader.

2

OPEN THE PANEL

Control Center → New → Jackson Guardian.
Pick your master account, slave accounts and the instrument to replicate.

3

ENTER YOUR KEY

Paste your JG-XXXX-XXXX-XXXX license into the LICENSE field and press Save.
Valid on 2 machines. Without a key the guardian will not engage.

4

LINK YOUR PHONE

In Telegram open @JacksonGuardianBot and send: /start YOUR-KEY
You will get the guardian's alerts on your phone, wherever you are.

5

PANIC BUTTON

From your phone: /panico → flattens ALL your accounts in seconds.
Also /estado to check your subscription and /soporte for human help.

♥ GOOD TO KNOW

- NinjaTrader 8 exclusive. Needs an internet connection (72 h offline grace).
- On SIM accounts fills arrive at the pace of the data feed: keep a chart open for each instrument. On real accounts orders fill at the exchange even if your screen lags.
- After restarting NinjaTrader, reopen the panel and re-enable the guardian: it starts OFF for safety.
